OBRAZLOZENJE PROJEKTA

1. SOCIOEKONOMSKI UTICAJ

Na platou visoravni Koscani i Grot nalazi se nekoliko zaseoka (Vasici,Ilici,Bozici) koja su u ratnom periodu raseljena i devastirana. Visoravan Koscani je u predratnom periodu bila poznato izletiste sa velikim brojem vikend kuca i bazenom za kupanje koji su takodje devastirani u ratnom periodu. Trenutno je obnovljeno oko deset vikendica i tri kuce. Otklanjanje minske opasnosti sa platoa Koscani i Grot, imalo bi veliki znacaj za povratak u ratu raseljenog stanovnistva. Do sada je u opcinu Donji Vakuf podneseno cca 80 zahtjeva za popravak kuca na Koscanima. Otklanjanjem minske opasnosti sa ovog podrucja stimulisalo bi se ostalo raseljeno stanovnistvo za povratak. Takodje, stvorilo bi se sigurno okruzenje za korisnike lokalnog makadamskog puta, lovce i izletnike. Otklanjanjem minske opasnosti na predmetnoj lokaciji utjecalo bi se na poboljsanje uslova za odrziv povratak.

Broj neposredno ugrozenih osoba i povremenih korisnika:	250

PROJECT DESCRIPTION

1. SOCIOECONOMIC IMPACT:

On the highland plateau Koscani and Grot there are a number of hamlets (Vasici, Ilici, Bozici) that were destroyed and devastated during the war. Before the war, the highland Koscani had been popular picnic grounds, with many weekend houses and a swimming pool, all of which were destroyed during the war. Currently, around ten weekend houses and three houses were reconstructed. Removing the threat of mines from the plateau Koscani and Grot would have significant impact on return of the war displaced population. So far, around 80 applications for reconstruction of houses in Koscani have been submitted to the municipal authorities of Donji Vakuf. Removal of mine threat in this area would encourage the still displaced population to return. Also, it would provide safe environment for users of the local macadam road, hunters and hikers. Removing the mine threat from the subject location would improve conditions for sustainable return.

Number of directly impacted persons and occasional users: **250**

Number of users after project implementation: **500**

2. PRIORITISATION:

THREAT LEVEL

H - HIGH

There are indications of PROM mines on the location. Indications mean that there is location available data on mine incidents/accidents, minefield records or reliable witnesses

LEVEL OF USE: **I**

CRITERIA
